VERMES

••••• MICRODISPENSING

today's fast-paced world, many applications in Defence, Aerospace, Consumer Electronics, Medical, Automotive, and Semiconductor industries require precise dispensing of adhesives in very small volumes, ranging from sub μ l to nl (micro or Nano liters). This is where VERMES comes in. VERMES has patented technologies that cater to the demands of this market with high speed and precision. Our solutions can jet 500-3000 shots per second, making us a preferred choice for Nano and Precise spot dispensing with super speed.

pentool®

Penta Auto Equipments was established as a private limited company in the year 2001, to create a world-class manufacturing facility capable of developing globally competent engineering products. The products manufactured by them meet the highest quality standards and have been guided by a policy which compasses the vision to be the best in our value system and business ethics.
